

RECTANGLE POOL ASSEMBLY INSTRUCTIONS

Step 0

Make sure you have all the parts for your pool.

Step 1

Take the liner bag and ground sheet out of the box; place the liner at the center of the ground sheet where you plan to place the pool. Be careful not to damage the liner when using a knife to open the box. Clear the area of any sharp objects.

Step 2

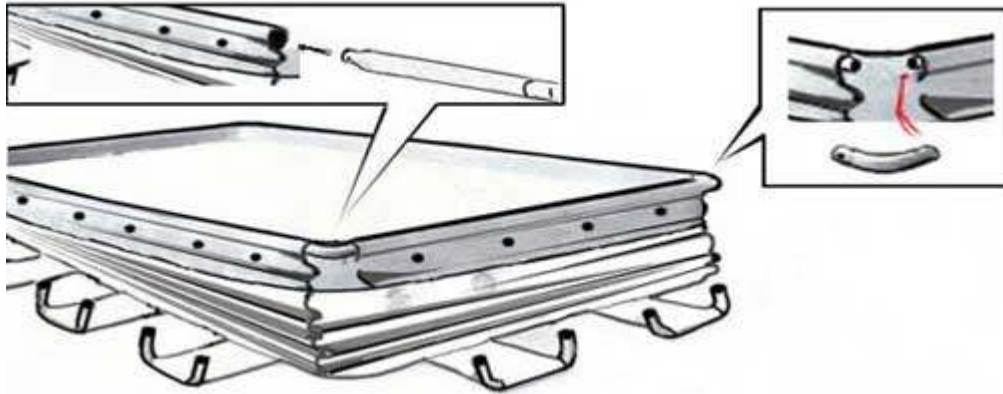

Unfold the liner. Please note which side of the pump is to be connected to the liner where the thru-the-wall fittings will be connected.

Step 3

Spread the bottom sleeves on each side of the liner.

Note: Number of bottom sleeves will vary for each side depending on the pool size. It is also advised that the thru-the-wall fittings be put on the liner at this stage; it is easier putting them on now rather than after pool is standing up.

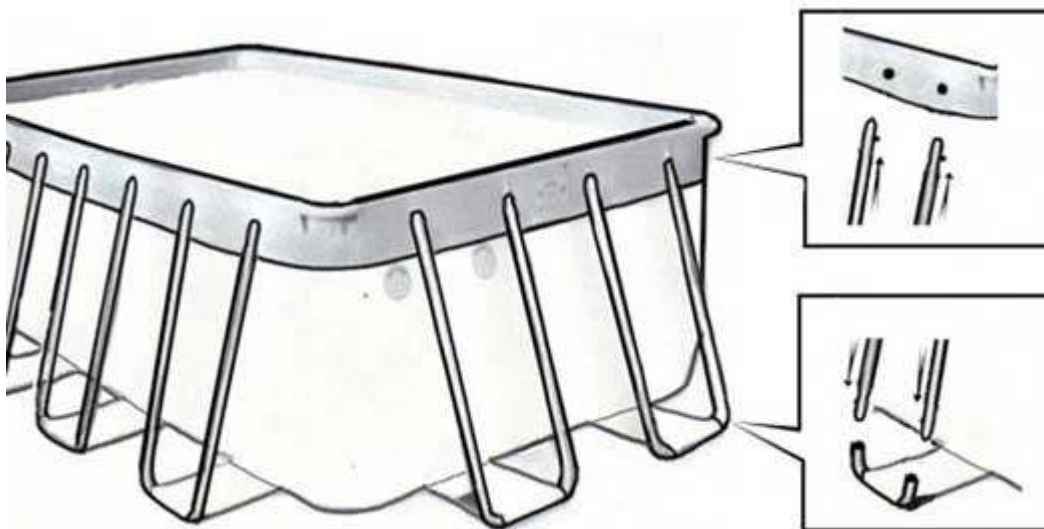

Step 4

Put one U-pipe through each of the bottom sleeve so the open ends of U-pipes will be pointed outwards.

Step 5

After finishing Step 4, use longer side of the liner in order to connect pipes easily one after the other. To make it easier, prepare all straight pipes connected and ready, then connect corner pipes at the end.

Note: Make sure the pipes are well connected and consistent. Also, there are four different shapes of pipes that have square pinhole on the surface. These pipes should be connected to the corner pipes that have pins on the surface.

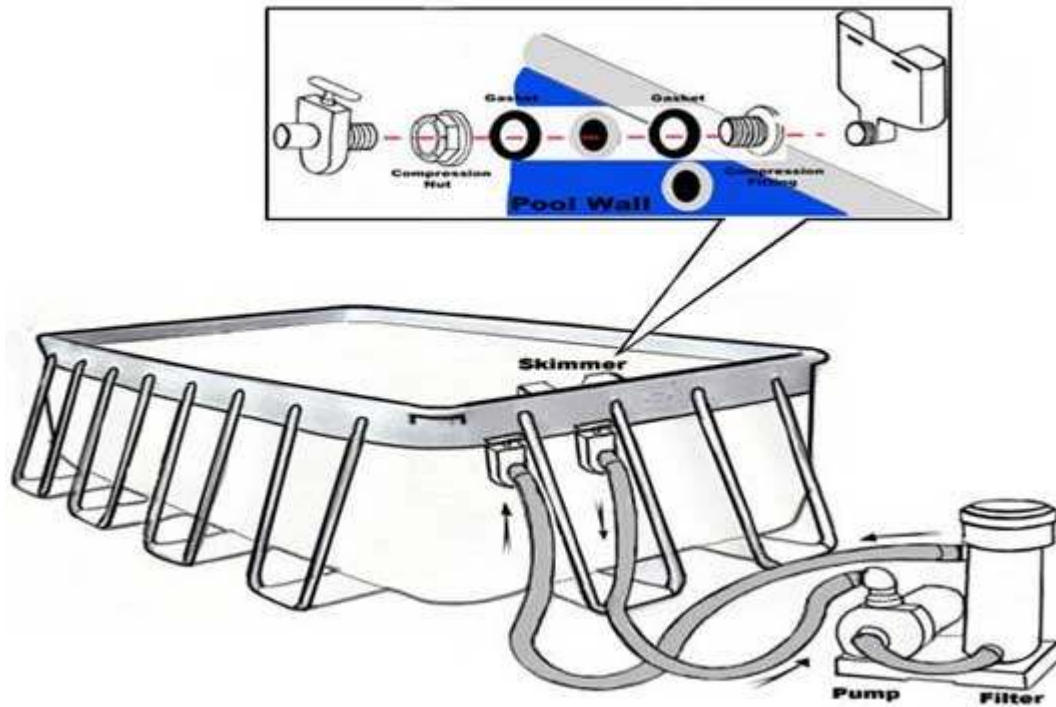

Step 6

Connect Stand-Pipes to the frame you've already made above through the liner holes. Those two pipes have male and female ends so you have to twist the Stand-Pipes in order to hold them tight and fixed.

Step 7

Lift up Stand-Pipes and connect them to U-Pipes at the same time.

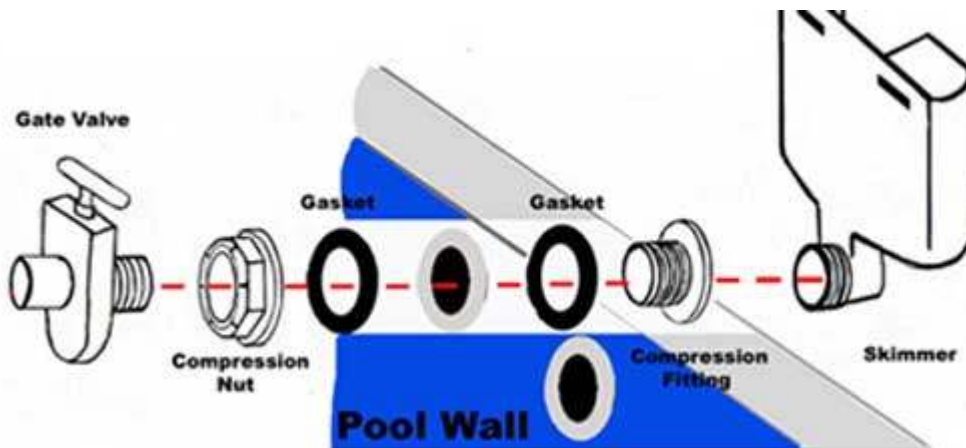

Step 8

After finishing step 7, you will get an approximate shape of the pool. However, make sure that all connected parts are fixed and well connected. It will be hard to adjust after filling with water because of water pressure.

Step 9

After installing Skimmer, Pump and Filter, fill the pool with water.

Tip:How to assemble the Wall fitting and Gate valve.

Step 10

Now, you are ready to swim!
